TABLE OF CONTENTS

A) Basic Information

- **Environment Setup** - Please visit this link and setup ionic CLI
  https://ionicframework.com/docs/intro/cli
- **Run our app with Expo** - Open **ionic-SocialMedia** folder on your selected IDE (VSCode is Recommended). Then follow below step.
  - Run **npm install** command in terminal.
    Note: If you get error in **npm install** then please try **yarn install** or **npm install --legacy-peer-deps**.

  - For run android app you need to set your android sdk path at **ionic-SocialMedia/android/local.properties** at line number **8**.
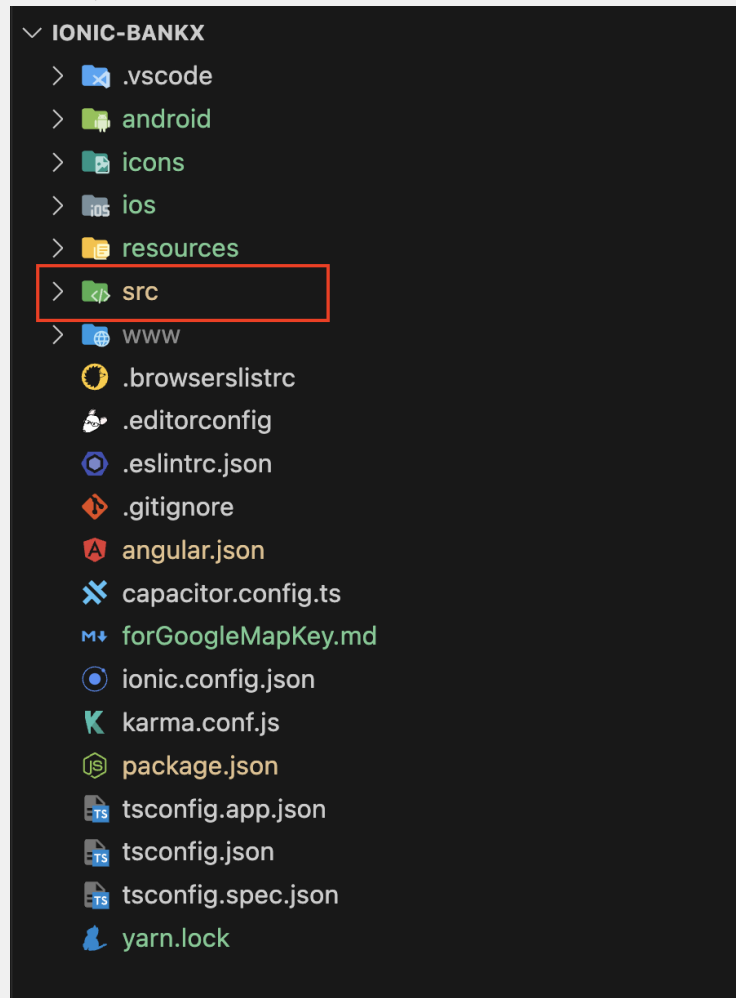

```
7   #Thu Jun 22 12:31:02 IST 2023
8   sdk.dir=/Users/UserName/Library/Android/sdk
9
```

  - Run **ionic capacitor run android -l --external** command in terminal for run app for android.
  - Run **ionic capacitor run ios --livereload --external** command in terminal for run app for iOS.
    For more about run ionic app please visit this link:https://ionicframework.com/docs/cli/commands/capacitor-run

- **Change App Icon**-https://capacitorjs.com/docs/guides/splash-screens-and-icons
- **Build & Release Android App**- https://ionic.io/blog/building-and-releasing-your-capacitor-android-app
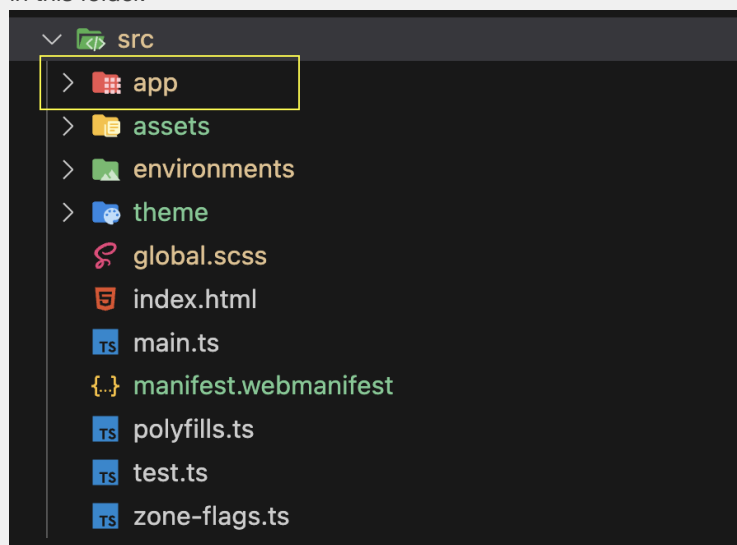

- **Build & Release iOS App**-
